

Good news! Good for Chaz!

The Hermanus Baboon Action Group is delighted to announce the launch of their children's story and activity book, "Good for Chaz".

The book is intended to create awareness of the plight of baboons and residents who exist on the urban edge. It is targeted at children between 4 and 10 years. The story relates to Hermanus' beautiful Fernkloof Nature Reserve, residents living on the urban edge, and the dilemmas faced by baboon troops in the area.

It is the perfect children's gift. Local children will identify well with the story. The book will be available through Hermanus Botanical Society and Whale Coast Conservation, both of which are beneficiaries of the profits derived from the sale of the books. Books will also be available from Hermanus shops:

Kidz Stuff toy shop, Trendy Tots, and local bookshops.
